

## IMPROVED qPCR digestive profiles and dermatophytes

Biovet is pleased to announce that the digestive profiles and the qPCR dermatophytes (ringworm) test have been improved and their **prices remain the same**.

qPCR Digestive profile (diarrhea) - canine	qPCR Digestive profile (diarrhea) - feline	qPCR Dermatophytes (ringworm)
CODE: DCAN-20219	CODE: DFEL-20212	CODES: DCAN-20286 (canine), DFEL-20314 (feline) et DNAC-20254 (Other small mammals)
<b>3 new parameters</b> ★	<b>3 new parameters</b> ★	<b>1 new parameter</b> ★
<p>INCLUDES</p> <ul style="list-style-type: none"> <li>★ <i>Clostridium difficile</i> toxin A</li> <li>★ <i>C. difficile</i> toxin B</li> <li>★ <i>C. perfringens</i> enterotoxin</li> <li>• <i>C. perfringens</i> toxA</li> <li>• <i>Campylobacter jejuni</i></li> <li>• Canine circovirus</li> <li>• Canine enteric coronavirus</li> <li>• Canine parvovirus type 2</li> <li>• <i>Cryptosporidium</i> spp.</li> <li>• <i>Giardia</i> spp.</li> <li>• <i>Salmonella</i> spp.</li> </ul>	<p>INCLUDES</p> <ul style="list-style-type: none"> <li>★ <i>Clostridium difficile</i> toxin A</li> <li>★ <i>C. difficile</i> toxin B</li> <li>★ <i>C. perfringens</i> enterotoxin</li> <li>• <i>C. perfringens</i> toxA</li> <li>• <i>Campylobacter jejuni</i></li> <li>• <i>Cryptosporidium</i> spp.</li> <li>• Feline coronavirus</li> <li>• Feline panleukopenia virus</li> <li>• <i>Giardia</i> spp</li> <li>• <i>Salmonella</i> spp</li> <li>• <i>Rotavirus</i> A</li> <li>• <i>Toxoplasma gondii</i></li> <li>• <i>Tritrichomonas blagburni</i></li> </ul>	<p>INCLUDES</p> <ul style="list-style-type: none"> <li>★ <i>Microsporium</i> spp.</li> <li>• <i>Microsporium canis</i></li> <li>• <i>Microsporium gypseum</i></li> <li>• <i>Trichophyton</i> spp.</li> </ul>
SAMPLE: 5 g of feces, refrigerated. ▲	SAMPLE: 5 g of feces, refrigerated. ▲	SAMPLE: hair and/or hair dander (minimum 10) *
Turnaround time: 2-3 days **	Turnaround time: 2-3 days **	Turnaround time: 24 to 48 hours **

Also available: qPCR digestive profile and parasitology (canine or feline).

▲ IMPORTANT: USE ONLY Fecal Containers without additive (blue cap) to send your feces samples and avoid contact of feces with litter.

\* Sensitivity increases with the number of hairs submitted. Submit in sterile, airtight container stored at room temperature or in the fridge (to prevent contaminant growth).

\*\* These tests are performed from Monday to Friday.
